Essential Studio includes seven component libraries in one great package.Essential Studio is available with full source code. It incorporates a unique debugging support system that allows switching between 'Debug' and 'Release' versions of our library with a single click from inside the Visual Studio.NET IDE.

To ensure the highest quality of support possible, we use a state of the art Customer Relationship Management software (CRM) based Developer Support System called Direct-Trac. Syncfusion Direc-Trac is a support system that is uniquely tailored for developer needs. Support incidents can be created and tracked to completion 24 hours a day, 7 days a week.

We have a simple, royalty-free licensing model. Components are licensed to a single user. We recognize that you often work at home or on your laptop in addition to your work machine. Therefore, our license permits our products to be installed in more than one location.At Syncfusion, we stand behind our products 100%. We have top notch management, architects, product managers, sales people, support personnel, and developers all working with you, the customer, as their focal point.

Backoffice products

These products helps in creating reports of different files formats. Following are some backoffice products:

1) Essential PDF
2) Essential XlsIO
3) Essential DocIO

Essential PDF:
Essential PDF is a .NET library that can produce Adobe PDF files. It features a full fledged object model for the easy creation of PDF files from any .NET language. It does not use any external libraries and is built from scratch in C#. It can be used on on the server side (ASP.NET or any other environment) or with Windows Forms applications.

Essential XlsIO:
Essential XlsIO is a .NET library that can read and write Microsoft Excel files (BIFF 8 format). It features a full fledged object model just like the Microsoft Office COM libraries. It does not use COM interop and is built from scratch in C#. It can be used on systems that do not have Microsoft Excel installed, making it an excellent report engine for tabular data.

Essential DocIO:
Essential DocIO is a .NET library that can read and write Microsoft Word files. It features a full-fledged object model similar to the Microsoft Office COM libraries. It does not use COM interop and is built from scratch in C#. It can be used on systems that do not have Microsoft Word installed.

The Syncfusion advantage

Built with the future in mind: Our products are geared toward long life-cycle applications and are architected to meet high standards for flexibility and maintainability. We provide comprehensive support for the latest technologies, including Visual Studio 2010 and .NET 4, as well as JQuery, AJAX, and SharePoint.

Full source code: We believe in empowering developers with source code; ours is written to be redistributed and shipped in a tightly integrated manner - use our components in debug mode at the flick of a switch.

First-rate technical support: Online, phone, and forum-based support ensure that you'll get the answers you need, when you need them. Our Direct-Trac support system is available 24x7, providing easy access to your complete incident history. Each license includes a one-year subscription for support and product updates - and unlike other vendors, we don't charge extra for phone support!

Straightforward, flexible licensing: Syncfusion components are licensed on a simple per-developer basis with no royalties, run-time, or server-deployment fees. Each licensed developer may install on multiple personal machines.

A viable base for standardization: The wide range of solid products in our suites allows our customers to reduce their dependence on multiple vendors and streamline their toolkits.
